Objective A: HIV/AIDS infection and non-communicable diseases (NCDs) reduced and supporting services improved

Rationale

Non-Communicable Diseases (NCD) and HIV and AIDS infections are among challenging labour related issues because of its implication to workers health and productivity. According to UNAIDS data of 2021, United Republic of Tanzania had estimated 1.7 million people living with HIV while NCD which is mainly attributed to lifestyle and environmental factors estimated to account for a third of overall disease burden. The Government has continued to take various measures to prevent spread of HIV and NCD including requiring all MDAs to develop workplace interventions and provide care and support services to staff living with HIV/AIDS and NCD. UNESCO NatCom will continue to adhere and implement Government's directions and guidelines on Prevention and Control of HIV/AIDS and NCD at workplace by mainstreaming the prevention approaches into its annual plans but the major challenges include lack of data on people living with HIV/AIDS and NCD as well as lack of courage to undertake test among employees.

In this regard, UNESCO NatCom will continue with fighting against HIV/AIDS and NCD pandemic through awareness creation and providing care and treatment to employees already infected.

Therefore, NACSAP III has been incorporated in this Strategic Plan due to the nature and scope of the business of the National Commission that include transactions between parties that are susceptible to unethical behaviors such as corruption. The Office will uphold the rule of law, democracy, efficiency, predictability, openness, and comprehensiveness by promoting good governance and accountability, thus minimizing corruption and other unethical practices at all levels.
